XPOS XPOS

Designed by a Singapore-based company, XPOS empowers merchants to seamlessly accept digital asset payments and facilitate cryptocurrency transfers to customers. With support for on-chain transactions across various blockchain networks such as BTC (Lightning Network), ETH (Ethereum), USDT (BEP20, TRC20), and BNB (BEP20), XPOS makes crypto payments easily accessible and user-friendly for both merchants and consumers alike. Say goodbye to traditional payment barriers and embrace the future of secure and efficient digital transactions with XPOS.

Merchant benefits

- Settle transactions in stable coin value with peace of mind, unaffected by price volatility.
- Effortlessly create multiple staff accounts to efficiently operate the XPOS system.
- Experience user-friendly simplicity at its best.
- Support a wide range of blockchain wallets for seamless integration.
- Easily set up local currency, tax, and service fees according to your preferences.
- Unlock the power to accept crypto payments and sell, reward, and transfer cryptocurrencies to your valued users.

Airkitchen AirKitchen

Airkitchen is an all-in-one restaurant software, optimized for the hospitality industry and integrated with Ingenico's Axium terminals for streamlined order and payment management. It includes a touchscreen cash register and server remote for efficient table-side service, along with self-ordering and payment modules for enhanced customer experience. Furthermore, the software accepts all common payment methods and offers a comprehensive back-office management system. In partnership with top resellers, AirKitchen provides the best equipment tailored to your business needs, making connected restaurant management more accessible.

Merchant benefits

- Experience quicker order-taking and seamless payment processing using our advanced Ingenico smart payment devices.
- Efficiently manage reservations and optimize your seating arrangements with our intuitive system.
- Enhance customer loyalty and retention with a personalized customer-based loyalty program.
- Leverage smart reporting tools to gain valuable insights into key business metrics such as turnover, margins, number of tickets issued, and average basket size.

b.free!

b.free! is a revolutionary digital platform committed to transforming the tourism trade by introducing a streamlined Tax Refund App. This innovation aims to enhance the shopping experience for tourists and open up new business opportunities. The b.free! app is designed to provide passport reading capabilities, meaning customers don't need to re-enter their data in different stores. It also includes a wallet profile and a QR code recognition system for added convenience.

Merchant benefits

- Experience an easy-to-use solution designed for both merchants and customers, ensuring a seamless user experience.
- Optimize efficiency by issuing tourist tax-free forms directly on consumers' phones, saving valuable time for everyone involved.
- Offer a simplified and hassle-free Tax-Free solution, enhancing the shopping experience for international visitors.

IFPoS **IFPoS**

IFPOS, the POS Lending Orchestrator, empowers businesses with the capability for instant financing right at the point of sale (POS) or any other channel. By enabling an end-to-end financing process that takes less than three minutes, it revolutionizes the customer purchasing journey. This process includes customer identification, phone validation, contract signature, and first payment, thereby simplifying the lending experience. Designed to be flexible and adaptable, IFPOS offers an omnichannel experience that can be adjusted to any device, process requirements, or brand aesthetics, delivering a white-label solution that's easily configurable. By evolving payment options at POS, it supports small and medium-sized enterprises, enables financing for all merchants, and enhances customer experience, thereby increasing merchant loyalty and boosting sales.

Merchant benefits

- Maximize revenue through increased frequency of repeat purchases, driving sustained growth.
- Experience quick serviceability and effortless checkout with our streamlined end-to-end lending process.
- Gain a competitive advantage by offering enticing BNPL promotions that maximize sales and attract customers.

Rovercash

RoverCash is an all-in-one retail payment software solution that is integrated with Ingenico's Axium terminals, providing a comprehensive solution for managing receipts and payments from a fixed or mobile cash register. It's an omnichannel solution that is highly adaptable to the needs of each retailer. The software's core functionalities include secured sales transactions, effortless product catalog management, inventory tracking, customer and loyalty management, real-time business analytics, and adherence to regulatory compliance.

Merchant benefits

- Streamline customer payments with a simplified process, from directory browsing to purchase association, basket management, and seamless payment processing.
- Digitize your product catalog for easy access and enhanced customer experience.
- Boost customer loyalty with a personalized program that offers enticing benefits and encourages repeat purchases.
- Leverage smart reporting tools to gain insights into key business metrics such as turnover, margins, number of tickets issued, and average basket size.

Touché

Touché is a comprehensive solution designed to optimize the operation of food and beverage services. With its integration to Ingenico Android terminals, Touché delivers efficient order taking and facilitates payment processing. Headquartered in Singapore, Touché offers a fully integrated mobile Android-based smart payment terminal, providing functionalities like digital bill presentation, split payments, tip management, error-free closing, automatic reconciliation with the acquirer, and tracking of all charge details. It also supports current and future payment methods provided by the acquirer. This innovative solution improves the guest experience, increases repeat business, and loyalty, and boosts profitability.

Merchant benefits

- Cut costs by utilizing a single device for order taking and payment processing.
- Enhance operational efficiency with increased staff mobility and reduced human error.
- Enjoy the convenience of digital receipts for a paperless experience.
- Benefit from integrated split payments and convenient pay-at-the-table options.

POS CONTROLE

POS CONTROLE

POS CONTROLE is a Mobile Point of Sale (POS) system that streamlines operations and reduces costs for businesses. It negates the need for additional equipment at your point of sale, thereby simplifying the setup process. It is capable of issuing Tokens or NFC-e and provides easy integration with your existing ERP system. The system integrates seamlessly with Ingenico terminals, which are known for their reliability and efficiency in payment processing. One of the key features of POS CONTROLE is its ability to generate online reports and graphs of your sales, providing valuable insights into your business performance.

Merchant benefits

- Effortlessly take orders and issue digital receipts using the Ingenico payment devices.
- Generate comprehensive online reports for valuable insights into your business performance.
- Track your sales seamlessly and integrate with your ERP system for streamlined operations.

ingenico

Paystone is a leading payment and software company that helps businesses enhance customer engagement and promote growth. Its solutions include automated payment processing, loyalty programs, and gift card solutions, which integrate seamlessly with payment providers, particularly Ingenico terminals. Paystone not only bolsters revenue and cash flow by promoting repeat business through gift cards, but also strengthens customer relationships by fostering loyalty. It also provides budget stability with unlimited transaction processing at no extra cost.

Merchant benefits

- Boost merchants' revenue and cash flow by leveraging the power of gift cards, as studies show that 40% of gift card recipients spend more than the value of their card and become repeat customers.
- Strengthen customer relationships for merchants, fostering loyalty and repeat business.
- Achieve budget stability with unlimited transaction processing at no additional cost, providing peace of mind and eliminating surprises.

givex Givex

Givex is a global company specializing in providing cloud-based business solutions to streamline operational efficiencies and derive actionable insights from customer data. Its primary offerings include gift cards, loyalty programs, and point of sale (POS) systems. These solutions not only help businesses increase their revenue and cash flow by promoting repeat customer engagement but also solidify customer relationships by fostering loyalty. By integrating seamlessly with existing business systems, Givex ensures a smooth transaction experience, providing businesses with the stability and peace of mind of an efficient, effective operational management system.

Merchant benefits

- Drive new revenue opportunities and boost your cash flow with our innovative solutions.
- Effortlessly send and track email promotions with our powerful tools, maximizing your marketing efforts.
- Enjoy automatic rewards and upsell capabilities at the point of sale, driving additional sales and increasing customer satisfaction.
- Benefit from round-the-clock merchant and customer support, ensuring you have assistance whenever you need it.

Push Button Services™ by POPCODES

POPcodes Push Button Services™ (PBS) solution helps merchants, acquirers, ISOs, and ISVs communicate, educate, and reach their customers. It also helps reinforce brand messaging, track usage, and differentiate services. Their solutions supplement payment providers' payment apps and traditional marketing platforms, and their app modernizes and digitizes the sales and support lifecycle that acquirers must develop with their merchants in today's digital age. Most importantly, Push Button Services™ (PBS) solutions are rapidly deployable and highly secure.

Merchant & Estate Owner benefits

- Quickly deploy value-added solutions (VAS) to merchants and their customers.
- Enhance the merchant experience and increase their satisfaction, retention, and lifetime value.
- Deliver essential information and automate key sales and support processes across large merchant portfolio.

Proof @ POS

PROOF @ POS by POPCODES

Proof @ POS™ (POPs) by POPcodes is a versatile solution designed to aid acquirers and ISOs in facilitating merchant services. With features such as Proof of Permission for customer data collection, Proof of Promotion for tracking in-store sales from digital marketing efforts, Proof of Purchase for efficient handling of online and pick-up orders, and Proof of Points for managing loyalty programs, POPs enhance customer engagement and service efficiency. This dynamic resource allows two-way communication, real-time updates, and detailed tracking, and is customizable to suit individual merchant needs. Importantly, it has no impact on PCI compliance or payment gateways, ensuring secure transactions.

Merchant benefits

- Ensure validated customer opt-in consent and data collection for seamless email and SMS communications, enhancing customer engagement and compliance.
- Personalize and track digital-to-in-store promotions, allowing for targeted and effective marketing campaigns that bridge the gap between online and offline experiences.
